## ABOUT LEWES OLD GRAMMAR SCHOOL

Lewes Old Grammar School (LOGS) prides itself on being a community which is moulded by the individual pupil's aspirations and needs. They believe co-education is the most natural way for pupils to learn. Working together, boys and girls develop natural friendships and interact with consideration in lessons and extracurricular activities.

### PROBLEM

LOGS had an issue with a deeply engrained grubby wooden floor. Using machinery would damage the floorboards so needed a powerful cleaning product.

### SOLUTION

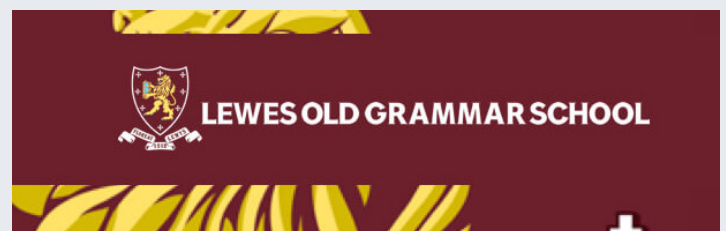

The dedicated account manager for LOGS suggested using the Oleonix full spectrum cleaner. When mixed with water penetrates and lifts out dirt and soiling, and can be used safely on most surfaces, including wood.

Using Oleonix alone managed to effectively clean and improve the look of the floors, meaning LOGS saved time and money on trying different chemicals and equipment.

### RESULTS

Due to LOGS Client Manager's expertise on floorcare, a better quality product was recommended quickly, making the floor cleaner and more visually pleasing. LOGS also found other areas they could use the product

on such as removing sticky residue effortlessly off cupboards where tape had once been.

By switching to these products, LOGS are now more environmentally friendly as Oleonix is a concentrate chemical meaning less plastic waste is produced through using multiple plastic spray bottles.

Using Oleonix to maintain floorboards will in the long-term save LOGS a substantial amount of money, as the need to purchase new floorboards is negated.

“ Our Account Manager was great in recommending Oleonix, and even did a product demonstration for us. The product has really improved the look of the floor and it's easy to use! ”
