

# CASE STUDY

## ABOUT SEAFORD HEAD SCHOOL

Seaford Head is an extremely successful school. They are committed to ensuring all students enjoy going to school and help them to achieve their full potential. The combination of support and challenge that their staff provide ensures that all students make outstanding progress and attain the very highest standards.

### PROBLEM

Seaford Head were struggling with an area of washroom floor. They found that no matter what product or technique used, the floor didn't improve in cleanliness or appearance.

### SOLUTION

The dedicated account manager for Seaford Head assessed the circumstances and decided to take in a Vileda Ultraspeed Mop System alongside the Jontec Forward SmartDose Floor Cleaner.

These products combined managed to drastically improve the cleanliness and appearance of the washroom floor.

Due to the high quality of the products, less of the floor cleaner chemical needed to be used. This has saved the school money by reducing the amount of product needed for each clean, as well as reducing the time spent by staff to ensure the floors are to a high standard of cleanliness.

### RESULTS

Due to the Seaford Head's Client Manager's expertise on floor care, better quality chemicals and equipment were recommended quickly, making the cleaning process easier for Seaford Head School.

By switching to this system, Seaford Head School are more environmentally friendly as cleaners were using disposable mop heads previously, so are now producing less plastic waste.

“Switching floor cleaning chemicals and starting to use the Vileda Mop has been really great! It's meant less time has to be spent cleaning the floors and more time can be spent cleaning other areas of the school. Our account manager was able to assess our needs and provide us with some great products - our floors are clean and look good too!”

**Sally Laidlaw - Business Manager**
