THE INTELLIGENT APPROACH  
TO HEALTH & HYGIENE

## ABOUT WARDEN PARK SCHOOL

Warden Park Academy prides itself on having a strong and enviable tradition for high standards in academic achievement and excellence in sports, the arts and charitable community projects. Throughout the COVID-19 pandemic, Warden Park Academy used Wightman & Parrish to help stay protected against COVID-19.

### PROBLEM

Warden Park Academy had three issues they needed Wightman & Parrish to help with. These were problems with graffiti, smelly washroom areas and having trouble getting ingrained dirt out of their safety flooring.

### SOLUTION

The Client Account Manager for Warden Park Academy decided to introduce one of our newest ranges of products from Buckeye. Buckeye's range of products are packaged in recyclable and biodegradable packaging. The chemicals are dispensed through The Buckeye Eco Proportioning Programme which makes diluting concentrated products virtually automatic. Eco proportioning systems are quick, easy, and accurate, saving time and money. The products are highly effective meaning they get the job done quickly and efficiently with less chemical.

### RESULTS

Due to Warden Park Academy's Client Manager's expertise on the Buckeye range, a better quality product range was recommended quickly. Through a site survey and demonstration Wightman & Parrish and Buckeye were able to show how the cleaning chemicals could effortlessly remove graffiti and could make the floors cleaner and more visually pleasing with little effort. A washroom and toilet cleaner called E42 Odor Counteractant Super Concentrated Odour Eliminator was introduced as well which dramatically improved the smelly washrooms. This was so successful members of staff were commenting on the pleasant smell from the product.

Using Buckeye has helped with multiple issues for Warden Park Academy and improved their sustainability by reducing plastic waste.

“

Wightman & Parrish installed the Buckeye dosing system into our premises about a month or so back and we have not had such an easy to use, selfdosing, clean, efficient, and environmentally friendly product, or products that do such an amazing job. Kirsty our Accounts Manager and Andy the Buckeye rep have been amazing and very willing to spend time to develop the correct products for us. The system was installed within an hour and so far no problems have been found that couldn't be resolved with a quick phone call to Kirsty. The best thing we have found about this system is that it is comparable, if not better in price than most other systems out there.

”
