- Non-alcohol based so safe and easy to use, transport and store
- Lab tested to kill MRSA, E-coli, Norovirus and Coronavirus and other
- viruses and bacteria to British Standards BSEN 1276 and 14476
- Has an ongoing effect even when dry
- Lab tested as safe on surfaces and the skin
- Suitable for use in any home or commercial environment
- Provides a streak free clean
- Biodegradable and non-toxic

108591 - 1 x 500ml Trigger Spray

Xtra Protect Multi Purpose Surface and Hand Sanitiser Personal Pump

- XtraProtect does not use aggressive chemicals, alcohol or bleach and is nontoxic and biodegradable
- Sanitises and forms an antimicrobial coating on a surface, which continues to protect against viruses and bacteria even when dry
- XtraProtect has been tested and can be used safely on both surfaces and the skin without damaging surfaces or drying the skin
- Water based antimicrobial solution with active ingredients that have been approved for use on surfaces and the skin under the European Biocide Regulation

108592 - 1 x 100ml Personal Pump

XtraProtect has been independently lab tested to kill a range of bacteria and viruses including Norovirus, Coronavirus Covid19, Ecoli, MRSA to British standards BSEN 14476 and BSEN 1276. We can provide copies of Lab Tests upon request.

XtraProtect provides a streak free clean to surfaces as well as being a very effective sanitiser, providing ongoing protection against viruses and bacteria even when dried on a surface. It is therefore optimal for customers who are looking for reassurance that their cleaning products will keep their work environments both safe and clean.

We can help with your changing requirements from Covid-19 - from sanitisers to PPE.
